Press Release

Stockholm, Sweden

May 18, 2006

EPIserver integrates with Google Search Appliance (GSA)

ElektroPost, a leading provider of Content Management Systems (CMS) today announces the availability of a module for the Google Search Appliance (GSA). The module is available for free download, including source code for developers.

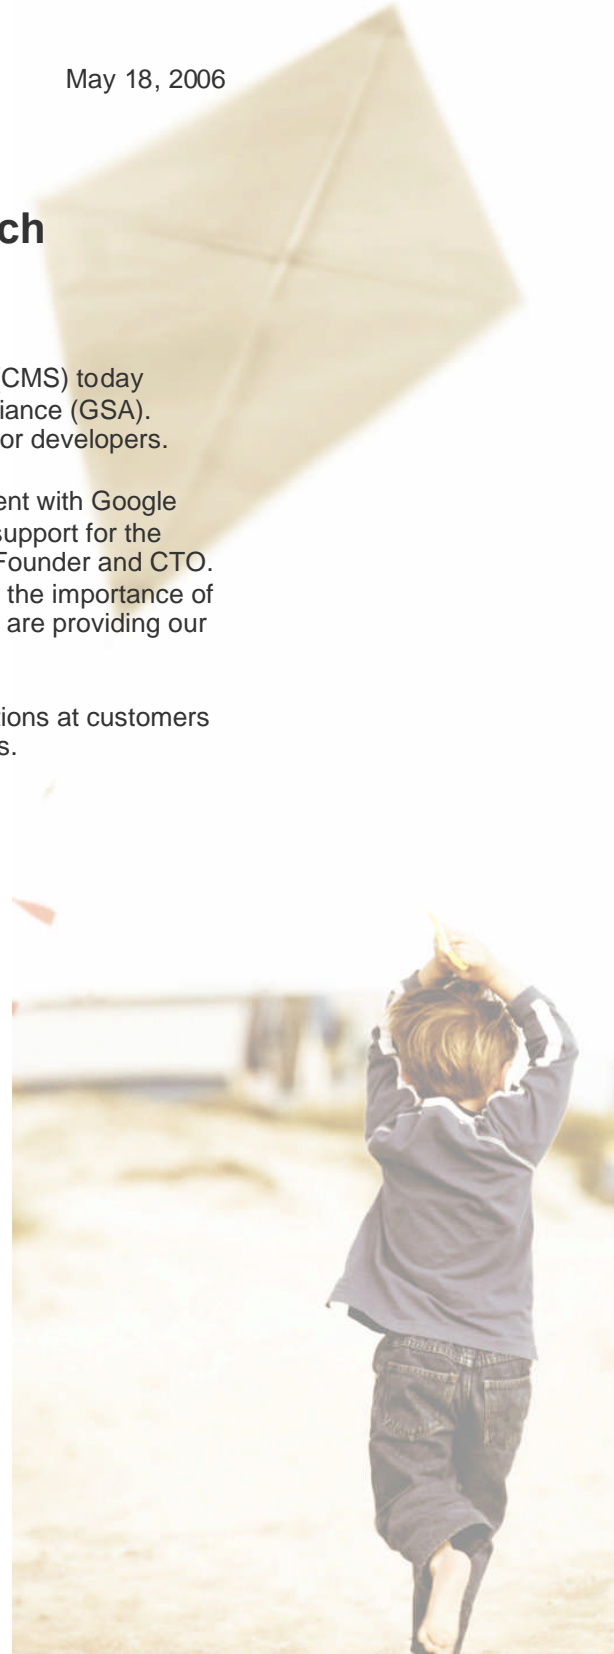

"ElektroPost was the first ISV in Europe to sign a partner agreement with Google regarding the search engine products. We are now adding native support for the Google product line, starting with the GSA, says Mikael Runhem, Founder and CTO. "Being a manufacturer of CMS systems makes us understand that the importance of search as a key factor for our customers. With the new module we are providing our customers with an enterprise class, high-end search engine".

EPIserver is the leading Nordic CMS with more than 1900 installations at customers such as Scandinavian Airlines (SAS), Absolut, Pfizer and Securitas.

Technical information about the module can be found at http://r.ep.se/projects/GSA_Search/
